2 DAY WORKSHOP

VIDEO EDITING MASTERY CLASS

SKILLSFUTURE CREDIT - ELIGIBLE

TGS-2021010242

Course Description

We introduce you to Final Cut Pro X, one of the best film-editing software in the world, and the one used in Hollywood. Raw footage always needs to be edited (the way articles need to be edited). We teach you the essential techniques and more efficient ways of film editing using a variety of stock footage and themes.

Benefits

At the end of the masterclass, you get a 30-second, well-composed, and colour-graded video clip with background music suited to your needs.

Core Learners

- Social media marketers, Influencers and Vloggers
- Real estate consultants
- Financial advisors
- Hobbyists with interest in video editing

Information

Prerequisite: You must be 21 or older and possess basic computer literacy.

Duration: 16 hours (including written and practical assessments)

Mode of Learning: In-person (classroom setting)

Learning Outcomes

- Understand the principles of video editing and the importance of customising pacing and rhythm for different kinds of video.
- Learn the relevant editing standards and guidelines and the techniques for technical edits.
- Learn the most important functions and features of video-enhancement software.
- Obtain a good understanding of the functions, features, and limitations of video-editing software and equipment.
- Practise techniques to integrate source files into edited footage to more effectively bring across the intended storyline.
